

No Steve – **JUST JOBS**

R&D Engineer (m/f/d)

Our client is a global leader in **automated solutions** for sustainable and natural **packaging solutions** in the border triangle, close to **Aachen and Maastricht**.

Your responsibilities:

- Proactive contribution to develop a new generation of products with regard to new concepts and production techniques
- Optimizing existing products
- Drawing up structured R&D plans, documentation, drawings and calculations
- Supervising and setting up product tests and the production of new products
- Actively looking for better solutions for the overall performance of the existing product range
- Identifying opportunities and developing product improvements
- Maintain regular contacts with both internal / external customers and suppliers, if necessary, also on location
- You represent our customer and you maintain good relationships
- Administration, sharing and reporting of activities related to R&D

Your qualification:

- Technical bachelor's and / or master's degree, preferably in Mechanical Engineering, Industrial Engineering or equivalent
- Plus 8 years' working experience in an R&D or engineering position with technical work environment and a strong affinity in automation
- Work preparation and / or project management experience is an advantage
- A broad interest, varying from equipment construction to process technology
- Affinity in automation
- Experience with AutoCAD Inventor / Solid Works or similar programs, mechanical drawing and reading electrical diagrams
- Able to think out of the box, innovative, creative to present practical solutions
- A driven personality who persists even when it gets tough and who can work independently
- You speak fluent English and furthermore either German or Dutch

Our Offer:

- Working with an innovative and international Team
- Above-average salary package, with top earning potential and pension insurance
- Very good opportunities for further development and training measures
